Thanks, John. Anita, does this look ok to you?

Thanks,
Melissa

Anita,

How about this for a response to Thia...

Internal deliberative information

Thia,

[REDACTED]

Thank you,
Melissa

Thia,

I am forwarding your question to the scientist working on the anticoagulants – this time I'll be sure to include her on the send!

Melissa,

Can you help Thia with her question? Thank you!

Kathy

Subject: Rozol and Kaput-D applicator training

Hello Kathy!

I have been conducting applicator recertification training in Colorado with regards to Pesticide Use Limitations in Colorado for these two products and the associated ESP bulletins. I was wondering if you could explain why you are required to use the same a.i. if retreating during the season. I have asked a few wildlife specialists if they know the reasoning behind this and none of us is certain. Could you please provide an explanation for that particular requirement?

thank you!

thia
